

GALVANIZING ACTION FOR CHILDREN WITH HEALTH COMPLEXITY IN DOUGLAS COUNTY: DESIGN PARAMETERS TO BE USED TO IDENTIFY PROPOSED ACTIVITIES

Background: The Oregon Pediatric Improvement Partnership (OPIP), supported by the The Ford Family Foundation and guided by a local Steering Committee, is leading efforts to support a focus on children with health complexity in Douglas County. On March 3rd, 2020 a meeting was held to review the child health complexity data, to review and confirm these design parameters, and to hear input on specific action steps that should be considered. **These design parameters will be used by OPIP to propose specific activities that will be reviewed and approved by the Douglas County Steering Committee.**

Proposed activities will:

- Be able to be **started in the next year.**
- Be **Family-centered & family-informed**, ensuring representation and diversity.
- Be **Provider-informed**, ensuring a diverse front-line provider perspective.
- Be **Trauma-informed** and ensure a focus on **cultural competence.**
- Be focused on **building strengths and resilience** in health complex children and their families.
- Ensure a focus for all children & will **include an intentional focus on health complex children under five.**
- **Align with and leverage priorities** and momentum within:
 - Coordinated Care Organization Priorities
 - Raise Up Oregon for Early Learning
 - Title V Priorities
 - Student Success Act
 - Other local community initiatives such as community health improvement plans, Network of Care, Systems of Care, the Blue Zones project, perinatal task force.
- Prioritize **populations and disparities most impacted by COVID-19 and the state and local government response** (added by OPIP in April 2020)
