

Training Primary Care Pilot Sites on Addressing Social-Emotional Delays Deliverable 2.7 May 2021

Background and Context: The *Pathways from Developmental Screening to Services* project is a community-level improvement effort focused on improving the receipt of services for young children identified at-risk for developmental, behavioral and social delays. A component of this work is focused on improving **follow-up to developmental screening in primary care practices (PCPs) for children identified with social emotional delays**. To support this, the Oregon Pediatric Improvement Partnership (OPIP) provided training, development of tools and resources to improve their follow-up, and provided at-the-elbow implementation support to the staff in the primary care practices who are leading the improvement efforts.

Content in This Summary: This report provides a summary of the training delivered to Madras Medical Group in February 2021. Due to the pandemic and staffing turnover, St. Charles Prineville did not want to participate in this training opportunity.

This training provided a refresher and deeper context on the pathways to support social emotional health including:

- Who to send to Internal Behavioral Health Services
- Developmental Promotion to Consider and How to Engage Families in Referrals to Behavioral Health Services
- Referrals to Internal Behavioral Health & Overview of their role including:
 - Brief assessments
 - Brief interventions
 - Identifying children to refer to Specialty Behavioral Health
- High Level Overview of Specialty Behavioral Health for Children Birth-5
 - Compendium of Services & Talking points about services

Through this training, primary care pediatric providers were provided enhanced guidance and tools to support children identified at-risk for social emotional delays on developmental screening in the context of well-care.
