

Follow-Up to Screening: How We Can Support Your Child

Why did we have you complete a questionnaire about your child's development?

Our goal is to help young brains and bodies develop and grow to their fullest potential. These support services can help prepare your child for kindergarten and beyond.

National recommendations call for specific tools to be used to assess a child's development, such as the one you completed. This tool helps identify kids who may be at-risk for delays. It is important to identify these delays early, as there are services that can address them.

Based on the results, we recommend referring your child to the services checked below:

Early Intervention (EI)/

Early Childhood Special Education (ECSE)

EI/ECSE helps babies and toddlers with their development. In our area, Northwest Regional Education Service District (NWRES D) runs the regional program. Washington County Service Center administers the evaluations and services.

EI/ECSE focuses on helping young children learn skills. EI/ECSE services enhance language, social and physical development through play-based interventions and parent coaching. **There is no charge (it is free) to families for EI/ECSE services.**

What to expect if your child was referred to EI/ECSE:

- NWRES D will call you to set up an appointment for their team to assess your child.
- If you miss their call, you should call back to schedule a time for the evaluation. They have a limited time to set up the appointment. Their phone number is [\(503\) 614-1446](tel:5036141446).
- The results from their assessment will be used to determine whether or not EI can provide services for your child.

behavioral & mental health services

Any Questions?

At Virginia Garcia Memorial Health Center, we are here to support you and your child. If you have any questions about the process or have not heard from your referral in two weeks, please call your child's medical team.

We are here to support you.

Why did you sign a consent form?

As your child's primary care provider, we want to be informed about the care your child receives so that we can provide the best care possible. The consent you sign allows the programs to share information back to us. You will likely be asked to sign more of these to give permission for different providers to communicate about your child's care.
